

Cryptex Locks

Engage in a thrilling quest to decipher the enigma

In this one-of-a-kind team building activity, each team is tasked with unlocking a series of cryptic locks to progress through a series of clues and challenges. But be warned - these locks are no ordinary locks. They are specifically designed to challenge your team's creativity, ingenuity, and strategic thinking.

How it Works:

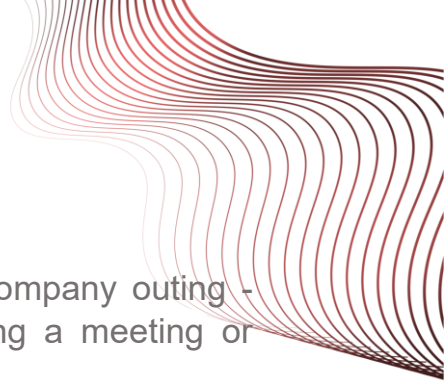

Each team is given a set of cryptic locks and a series of clues that lead to a final destination where a prize awaits them. However, there's a catch - the clues are hidden in plain sight but are written in a secret language that only the team members can decipher. The team must work together to decode the clues using their knowledge, skills, and intuition.

To add an extra layer of challenge, the teams are given a time limit to solve the clues and unlock the cryptic locks. If they fail to solve the clues within the allotted time, the locks will self-destruct, and they will be disqualified.
