

## Tabletop Chain Reaction

### Connect, strategize, and triumph together in our tabletop adventure

TableTop Chain Reaction is a popular team building activity that involves the creation of a complex series of items that performs a simple task. The task is typically something like ringing a bell or lighting up a bulb, and the machine is created by linking together a series of devices or mechanisms that trigger each other in sequence.

#### How it Works:

Each team member is responsible for designing and building one component of the “Rube Goldberg” machine, and the team must work together to ensure that each component is linked correctly and that the machine functions as a whole. The activity encourages communication, collaboration, problem-solving, and creativity, and it can be adapted to different group sizes and skill levels.
